

Recommendation T/R 61-02

Harmonised Amateur Radio Examination Certificate

Approved Chester 1990; amended Vilnius 2004

Amended Annex 2: January 2015

Amended Annex 4: October 2014

Amended Annex 6: February 2016 (updated February 2018)

INTRODUCTION

The Recommendation as approved in 1990 makes it possible for CEPT administrations to issue a Harmonised Amateur Radio Examination Certificate (HAREC). The HAREC document shows proof of successfully passing an amateur radio examination which complies with the Examination Syllabus for the HAREC. It facilitates the issuing of an individual licence to radio amateurs who stay in a country for a longer term than that mentioned in CEPT Recommendation T/R 61-01. It also facilitates the issuing of an individual licence to a radio amateur returning to his native country showing the HAREC certificate issued by a foreign Administration.

The Recommendation as revised in 1994 has the aim to make it possible for non-CEPT countries to participate in this system. This revision is comparable to the extension of Recommendation T/R 61-01 to non-CEPT countries.

The revision of 2001 lowered the requirements for sending and receiving Morse code signals from 12 words per minute to 5 words per minute.

The revision of 2003 removed the requirement for sending and receiving of Morse code signals.

RECOMMENDATION T/R 61-02 OF FEBRUARY 2004 ON HARMONISED AMATEUR RADIO EXAMINATION CERTIFICATE (T/R 61-02)

“The European Conference of Postal and Telecommunications Administrations,

considering

- a) that the Amateur Service is a service according to the ITU Radio Regulations article 1 and governed by the ITU Radio Regulations and national regulations;
- b) that administrations are responsible, in accordance with article 25 of the ITU Radio Regulations, to verify the operational and technical qualifications of any person wishing to operate an amateur station;
- c) that significant differences between the existing national regulations and licence conditions impede the radiocommunication activities by licensed radio amateurs outside their own country;
- d) that in an international context the International Amateur Radio Union has supported the concept of the harmonisation of examination levels concerning the amateur service;
- e) that CEPT Recommendation T/R 61-01 concerns only temporary use of amateur stations in CEPT and non-CEPT countries;
- f) that CEPT countries and non-CEPT countries are mutually seeking to harmonise regulations and matters also concerning non-commercial and recreational activities of their citizens;

noting

- a) that it is highly desirable to establish a common arrangement for radio amateurs who wish to use amateur stations in another country in which they are taking up residency;
- b) that a common approach can be found in spite of the great variety of classes of amateur licenses and examinations prevailing in the different CEPT countries and non-CEPT countries;
- c) that on the basis of this commonality it is possible to designate which national classes of amateur licences and examinations are of a similar nature;
- d) that in general good experience has been gained by the introduction of Recommendation T/R 61-01 although the classification of the various national licence classes into the CEPT licence causes some difficulties regarding the minimum examination standard;
- e) that despite the procedures of this Recommendation, administrations have the right to require separate bilateral agreements when recognising the radio amateur certificates issued by foreign administrations;

recommends

1. that CEPT administrations issue a mutually recognised Harmonised Amateur Radio Examination Certificate to those passing the relevant national examinations corresponding to the CEPT examination standard (see ANNEX 1:);
2. that administrations, not being members of CEPT, accepting the provisions of this Recommendation, may apply for participation in accordance with the conditions laid down in ANNEX 3: and ANNEX 4:;
3. that administrations participating in this system agree, subject to their national laws and regulations to issue national licences corresponding to the CEPT examination standard to foreign nationals who possess a Harmonised Amateur Radio Examination Certificate issued by an Administration participating in this system and who stay in their country for a period longer than three months;
4. that any person who has obtained a Harmonised Amateur Radio Examination Certificate in any country participating in this system, has the right on return to his own country to obtain a licence there without having to pass a further examination;

5. that administrations shall ensure that the information shown in ANNEX 2: and ANNEX 4: (licence classes equivalent to the CEPT examination level) is kept up-to-date when national legislation is amended.”

Note:

Please check the Office documentation database (<http://www.ecodocdb.dk>) for the up to date position on the implementation of this and other ECC Recommendations.
